

Studying Maths could lead you to an exciting career

STEM SCIENCE | TECHNOLOGY ENGINEERING | MATHS

Anh Kieu
Orthoptist

Anh was only four when her family left Vietnam to begin a new life in Australia. She completed her schooling in the South Western suburbs of Sydney and went straight into a Bachelor of Medical Science at the University of New South Wales (UNSW). Anh graduated and commenced full time research into kidney disease.

With a keen interest in maths and a connection to orthoptics after her grandfather's difficult cataract operation, Anh enrolled in the Masters of Orthoptics course at the University of Sydney. In stages of both pre-and post-operative care, she is now responsible for the detection, diagnosis and management of eye diseases.
